SDN, NFV + JAVA

Revenue is driving SDN and NFV.

- +68%: Automatic Service Provisioning to scale services faster
- +61%: Automatic Network Provisioning and end-to-end Control
- +85%: Launch New Services and generate new revenue
- +62%: Use Commodity Hardware

But adoption of SDN and NFV depends on Performance

Maximize ROI on all Java-based SDN and NFV solutions with Zing

- Reliability: 24/7
- Portability
- Standards Consistency
- Reduce Latency

Improve availability and scalability with higher throughput.

Proven with thousands of nodes in the cloud.

No re-coding or re-architecting.
